(10) publishes—

(A) interim final regulations under section 210(b) of the Motor Carrier Safety Improvement Act of 1999 (49 U.S.C. 31144 note) that establish minimum requirements for motor carriers, including foreign motor carriers, to ensure they are

that adequate telecommunications links exist at all United States-Mexico border crossings used by Mexican motor carrier commercial vehicles, and in all mobile enforcement units operating adjacent to the border, to ensure that licenses, vehicle registrations, operating authority and insurance information can be easily and quickly verified at border crossings or by mobile enforcement units;

(F) there is adequate capacity at each United States-Mexico border crossing used by Mexican motor carrier commercial vehicles to conduct a sufficient number of meaningful vehicle safety inspections and to accommodate vehicles placed out-of-service as a result of said inspections;

(G) there is an accessible database containing sufficiently comprehensive data to allow safety monitoring of all Mexican motor carriers that apply for authority to operate commercial vehicles beyond United States municipalities and commercial zones on the United States-Mexico border and the drivers of those vehicles; and

effective enforcement and monitoring of license revocation and licensing procedures of Mexican motor carriers.

(2) The Secretary of Transportation certifies in writing in a manner addressing the Inspector General's findings in paragraphs (c)(1)(A) through (c)(1)(H) of this section that the opening of the border does not pose an unacceptable safety risk to the American public.

SEC. 351. Notwithstanding any other provision of law, for the purpose of calculating the non-federal contribution to the net project cost of the Regional Transportation Commission Resort Corridor Fixed Guideway Project in Clark County, Nevada, the Secretary of Transportation shall include all non-federal contributions (whether public or private) made on or after January 1, 2000 for engineering, final design, and construction of any element or phase of the project, including any fixed guideway project or segment connecting to that project, and also shall allow non-federal funds (whether public or private) expended on one element or phase of the project to be used to meet the non-federal share requirement of any element or phase of the project.

SEC. 352. (a) FINDINGS.—Congress makes the following findings:

(1) The condition of highway, railway, and waterway infrastructure across the Nation varies widely and is in need of improvement and investment.

(2) Thousands of tons of hazardous materials, including a very small amount of high-level radioactive material, are transported along the Nation's highways, railways, and waterways each year.

(3) The volume of hazardous material transport increased by over one-third in the last 25 years and

is expected to continue to increase. Some propose significantly increasing radioactive material transport.

(4) Approximately 261,000 people were evacuated across the Nation because of rail-related incidents involving hazardous materials between 1978 and 1995, and during that period industry reported 8 transportation accidents involving the small volume of high level radioactive waste transported during that period.

(5) The Federal Railroad Administration has significantly decreased railroad inspections and has allocated few resources since 1993 to assure the structural integrity of railroad bridges. Train derailments have increased by 18 percent over roughly the same period.

(6) The poor condition of highway, railway, and waterway infrastructure, increases in the volume of hazardous material transport, and proposed increases in radioactive material transport increase the risk of incidents involving such materials.

(7) Measuring the risks of hazardous or radioactive material incidents and preventing such incidents requires specific information concerning the condition and suitability of specific transportation

routes contemplated for such transport to inform and enable investment in related infrastructure.

(8) Mitigating the impact of hazardous and radioactive material transportation incidents requires skilled, localized, and well-equipped emergency response personnel along all specifically identified transportation routes.

(9) Incidents involving hazardous or radioactive material transport pose threats to the public health and safety, the environment, and the economy.

(b) STUDY.—The Secretary of Transportation shall, in consultation with the Comptroller General of the United States, conduct a study of the effects to public health and safety, the environment, and the economy associated with the transportation of hazardous and radioactive material.

(c) MATTERS TO BE ADDRESSED.—The study under subsection (b) shall address the following matters:

(1) Whether the Federal Government conducts or reviews individualized and detailed evaluations and inspections of the condition and suitability of specific transportation routes for the current, and any anticipated or proposed, transport of hazardous and radioactive material, including whether resources and information are adequate to conduct such evaluations and inspections.

(2) *The costs and time required to ensure adequate inspection of specific transportation routes and related infrastructure and to complete the infrastructure improvements necessary to ensure the safety of current, and any anticipated or proposed, hazardous and radioactive material transport.*

(3) *Whether emergency preparedness personnel, emergency response personnel, and medical personnel are adequately trained and equipped to promptly respond to incidents along specific transportation routes for current, anticipated, or proposed hazardous and radioactive material transport.*

(4) *The costs and time required to ensure that emergency preparedness personnel, emergency response personnel, and medical personnel are adequately trained and equipped to promptly respond to incidents along specific transportation routes for current, anticipated, or proposed hazardous and radioactive material transport.*

(5) *The availability of, or requirements to, establish governmental and commercial information collection and dissemination systems adequate to provide public and emergency responders in an accessible manner, with timely, complete, specific, and accurate information (including databases) concerning actual,*

proposed, or anticipated shipments by highway, railway, or waterway of hazardous and radioactive materials, including incidents involving the transportation of such materials by those means and the public safety implications of such dissemination.

(d) DEADLINE FOR COMPLETION.—The study under subsection (b) shall be completed not later than 6 months after the date of the enactment of this Act.

(e) REPORT.—Upon completion of the study under subsection (b), the Secretary shall submit to Congress a report on the study.

(3) *Subsection (d) of that section requires the Secretary of Transportation to monitor the safety performance of drivers of commercial motor vehicles who are subject to an exemption under section 345 and report to Congress prior to the rulemaking proceedings.*
